personal portfolio

PROFILE:

Graduate Software Engineer with a BSc in Computer Science from UCT, experienced in building and testing full-stack systems through academic and personal projects. Exposure to agile development, code reviews, and testing practices during an internship at Impact.com. Strong foundation in Java, Python, and software quality principles. Continuously learning and currently expanding my Java backend skills through the Spring Framework.

SKILLS:

- **Languages:** Java, Python, JavaScript
- **Backend:** Spring (learning), Flask, REST APIs
- **Testing:** JUnit, pyTest, Unit Testing
- **Frontend:** React, HTML, CSS
- **Databases:** MySQL, Firebase
- **Tools:** IntelliJ IDEA, Git, GitHub, Postman, Jira, Confluence, Slack
- **Concepts:** OOP, Data Structures, Design Patterns, Agile, Clean Code
- **Soft Skills:** Communication Skills, Collaboration, Leadership, Problem-Solving

WORK EXPERIENCE:

Software Engineer Intern

impact.com | Jan 2026 – Feb 2026

- Gained exposure to how software engineering teams operate in an industry environment
- Learnt and applied clean code principles and best practices for writing readable, maintainable code
- Contributed to code reviews to understand quality standards, feedback processes, and collaborative development
- Designed and executed unit tests using JUnit to ensure code reliability.
- Took part in agile ceremonies, including daily stand-ups
- Developed an understanding of large-scale codebases and professional engineering standards

Junior Software Engineer

Dubs Programme | Feb 2026 – Present

- Designed and implemented an automated geocoding pipeline for DUBSPROJ, which converts volunteer residential addresses to GPS coordinates (lat/long) using Python and the Nominatim (OpenStreetMap) API, and synchronize the results with Google Drive.

PERSONAL PROJECTS:

AI Content Detector WebApp

- Designed and developed a full-stack AI-powered application with a team of three, achieving over 85% accuracy in detecting AI-generated content while ensuring reliable backend processing and API integration.
- Technologies: React(frontend), Python/Flask (backend), Hugging Face Transformers, CNN, Firebase, GitHub.
- **Live App**: https://aicontentdetect.netlify.app/

ChillBuddy WebApp

- Implemented a PoC called ChillBuddy, which is an innovative mental health support application that combines AI-driven conversations, gamification, and comprehensive resources to provide accessible mental health support. Built for the South African Intervarsity Hackathon 2025, ChillBuddy aims to make mental health care more approachable and engaging for young adults.
- Technologies: HTML5, CSS3, JavaScript(frontend), Python/Flask (backend), Hugging Face Transformers, GitHub.

Weather App

- Developed and deployed SA Weather App, a dynamic web application that provides real-time weather information for cities across South Africa. Users can search for a city, view current weather conditions, and explore additional weather layers such as precipitation and temperature.
- Technologies: HTML, CSS, JavaScript, GitHub, Leaflet, APIs.
- **Live App:** https://mzantsiweather.netlify.app/

EDUCATION:

BSc Computer Science & Genetics

University of Cape Town | 2022 – 2025

- **Relevant Coursework:** Data Structures, Algorithms, Databases, Software Design, Computer Networks, Java, Agile Methodologies, Advanced Software Development

CERTIFICATIONS:

- **Full Stack Development – IT Varsity & FNB App Academy (2025)**
- **REST APIs, JavaScript, Web APIs – LinkedIn Learning**
- **View Certifications on My-LinkedIn-Profile**

LEADERSHIP EXPERIENCE:

Faculty Tutor - University of Cape Town (2025)

- Supported students in understanding technical concepts and problem-solving

Student Front Desk Assistant Coordinator - University of Cape Town (2024)

- Supervised and coordinated a team of reception staff, improving workflow efficiency

Junior Mentor - University of Cape Town (2023)

- Led peer mentorship initiatives and supported student development
